Shed Design Guide

STEP 1

Select a Size

Things to consider when selecting the right size:

- What will you use it for?
- Will there be seasonal items stored?
- How can you maximize the wall space?
- How can you maximize the overhead space?

STEP 2

Choose Your Style

STEP 3

Trim Package, Doors and Windows

TRIM PACKAGE	Trim Style	Roof Overhang	Trim on Door	Trim Around Door	Hinges	Window Size	Window Trim	Shutters
CLASSIC	Metal	3"	Perma	None	Standard	18"x27"	None	Louvered
COLONIAL	Miratec	6"	Miratec	None	Standard	18"x27"	Miratec	Z-style
VICTORIAN	Miratec	12"	Miratec	Miratec	Victorian	24"x36"	Miratec	Z-style

STEP 4

Customize the Colors

Choose the type, then choose the color
for your siding, trim and roofing
(Options shown on pages 22 and 23)

Measurements refer to weather vane figure only

Site Selection and Preparation

ACCESSIBILITY:

Choose a spot where we can back up to the short side of the pad with our truck and trailer.

Our 22' truck with a 28' or 38' trailer must be able to back up to the short side of the pad.

Choosing the location for your new shed, barn or gazebo:

- ___ Is the site level, or can it be made level?
- ___ Is the short side of the pad sufficiently accessible for our truck and trailer? "
- ___ Is the ground (driveway and/or lawn) hard enough for us to drive on with a heavy truck, trailer and shed?
- ___ We can NOT drive over ANY type of septic system, mound system, leach field, etc.
- ___ We are not responsible for property damage caused during the delivery process.
- ___ It is recommended that double wide buildings (over 14' wide) have a concrete base.

APPROACH: The ground must be dry and solid and the entire approach must be clear of obstacles.

Above: We need at least 13'6" clearance, and even more space above the pad where the trailer will tilt up to off load the shed. Check for overhead wires, house eaves, branches and other obstacles.

Sides: We need the width of your shed plus one foot on each side. The approach and site must be clear from the road all the way to your site. Check for branches, bushes, fencing, play grounds, etc.

Below: The ground (driveway and/or lawn) must be hard enough for us to drive on with a heavy truck, trailer and shed. We will leave ruts and/or get stuck if it is not. We can not drive over any type of septic system, mound system, leach field, etc.

Abutting Property: We can not drive across your neighbor's property without their written permission. Ask us for a liability waiver if needed.

LEVEL SITE: Your shed needs a flat and level pad with enough material to prevent settling.

To create a flat and level base for your new structure use a 3/4" crushed stone or gravel and create a pad that is two feet bigger than the shed on all four sides. It may need to be thicker in some areas than in others for it to be level. Use enough material to prevent settling, we suggest a minimum of 4" to 6", depending on soil type. To ensure your pad is square measure diagonally from corner to corner, the two diagonals should measure the same. To make sure your pad is level, use a transit or a long board with a level to check it in several spots.

Top View

Please Note:

* We do not recommend using cinder blocks to level or support your shed

* If your shed pad is not level then your doors and windows will not function properly

* Livingston Farm's crew is not responsible for fixing shed pads that are not level

Specifications & Delivery

FREE DELIVERY within 50 miles!

Free delivery within 25 miles for buildings requiring on site assembly.

Our specially designed trailer allows for fast and convenient delivery.

Prepare your own base or let Livingston Farm's expert crew prep it for you!

See page 26 for important delivery details!

Poly Color Options

How to interpret
our furniture product
codes and pricing:

First letter:
tells you which
group of colors
to reference:
V, C or W

— V104SP —

Middle digits:
tells us which
product it is

Last two letters:
tell you which type of color it is:
SP = Standard Poly Color
CP = Custom Poly Color
RP = Rustic Poly Color

Colors shown are
representational
and cannot be
guaranteed to match.

\$315/325lb sack

Natural Stone Veneer

Natural Stone Veneer Specifications and Style Guide

SAWN BACK THIN VENEER	ASHLAR This stone provides a linear look with long, fairly rectangular shapes. It exhibits the face of the stone, revealing striations that can be very colorful.	SQUARES & RECTANGLES These natural seam faced pieces are guillotines and formed into rough squares and rectangles.	MOSAIC Irregular shaped quarry material exhibiting the seam and/or the natural face of the stone. No shape is the same size or cut, making each project unique.	LEDGE This roughly rectangular shaped cut has a linear appearance with a shallow, slightly varied height. Split faced stones dominate this cut, but the seams are also seen.
